EVTEKS, FOR NATURE

Corporate Social Responsibility (CSR)

As Evtteks, we adopt CSR. In this context, in order to protect our environment, our aim is to use recycled products and recycle waste, to manage and minimize waste, and to eliminate situations that may harm our environment, such as using energy efficiently. At the same time, it is very important for us to train our employees on these issues.

Transparency

As Evtteks, we are proud to ensure that information is shared accurately and clearly.

Recycle

Recycling is also of great importance at Evtteks. One of our most important goals is to use recycling in our productions in order to contribute to reducing the carbon footprint in our productions.

Green Energy

As Evtteks, we use these resources as green energy certified (YEK-G) in our factory in order to protect our nature and not harm our environment.

Rainwater Harvesting

In our factory, rainwater harvesting is carried out for use in cleaning and toilets. Thus, water consumption will be reduced.

Social Responsibility

We continue our activities in order to contribute to people and beautify the environment with our social responsibility projects. We encourage these activities not only for ourselves but also for employees and other communities.
